Message: As discussed Joel, Each individual
district should determine the correct water
supply sign size based on actual field conditions.
These conditions would include but not be limited to:
state Right of Way Availability, urban area or rural or
other unforeseen factors that would dictate the two
smaller sizes.

Thanks, Ken

WATER SUPPLY AREA SIGN

The Water Supply Area Sign (180-1) may be installed where a wellhead or watershed protection program approved by the Department of Environmental Protection (DEP) exists, and a water supply protection area plan is in use. The spill response telephone number shall be "911" where this service is available, if this service is not available the county emergency management agency number should be used, or if not available, DEP's toll-free number "1-800-541-2050" should be used.
